

TECHNOLOGY CONSULTING & SOLUTIONS

Helping Businesses Work Smarter

Practical technology, automation, and software solutions built around your business goals.

SIMPLIFY. CONNECT. GROW.

Business-first. Purpose-built.

Technology that makes business easier.

PRACTICAL TECHNOLOGY. MEANINGFUL IMPACT.

NyxDay Inc. is a Canadian technology consulting and software solutions company helping organizations simplify operations, connect systems, and improve digital experiences.

We bring together business consulting, software engineering, automation and delivery leadership to translate business needs into workable technology solutions.

OUR FOCUS

Business-first

Start with the problem, not the tool.

Purpose-built

Fit the solution to the actual workflow.

Delivery-minded

Connect planning with execution.

Our Core Capabilities

Services designed around practical business challenges

01

Business Process Automation

Replace repetitive manual steps with streamlined approvals, automated notifications, and connected workflows that reduce administrative effort.

02

AI & Intelligent Workflows

Apply AI to practical business needs, from intelligent workflow support and customer interactions to information retrieval and decision assistance.

03

Systems Integration

Connect your CRM, cloud tools, internal platforms, and APIs so information moves reliably between teams and business processes.

04

Custom Software Development

Build tailored portals, dashboards, and operational applications around the way your organization actually works, with room to grow.

Capabilities Across the Lifecycle

From customer-facing experiences to complex delivery programs

05

Mobile Application Development

Create mobile-friendly experiences and applications that give employees and customers convenient access to the services they need.

06

Website Development

Build responsive websites, landing pages, and digital portals that communicate clearly, support customers, and strengthen your online presence.

07

Business Consulting & Advisory

Turn business challenges into clear requirements, practical technology roadmaps, and improvements grounded in your operational priorities.

08

Project & Delivery Leadership

Lead teams, coordinate stakeholders, manage priorities and delivery risks, and guide initiatives from planning through implementation.

From challenge to working solution.

01

DISCOVER

Understand objectives, constraints, users and current workflows.

02

DESIGN

Define the right experience, architecture and delivery plan.

03

BUILD & CONNECT

Develop, automate and integrate with the systems that matter.

04

DELIVER & IMPROVE

Roll out, review results and iterate based on real feedback.

FEATURED SOLUTION

PeopleEvo

A NyxDay-developed SaaS product

PeopleEvo

Workforce operations, made simpler.

PeopleEvo is a cloud-based workforce management platform developed by NyxDay to simplify employee operations and streamline administrative processes.

Starting with Leave Management, it offers configurable policies, automated approval workflows, team calendars, and employee self-service, with additional modules under development.

PeopleEvo demonstrates NyxDay's ability to design, build, and deliver scalable SaaS solutions that address real business needs.

SELECTED PRODUCT CAPABILITIES

Leave Policies

Configurable rules and balances

Request & Approval

Structured employee workflows

Team Calendars

Visibility across approved leave

Administration

Roles, groups and controls

Experienced in complex delivery environments.

**Technology delivery requires more than code.
It takes ownership, coordination, and the
ability to turn priorities into outcomes.**

Delivery Leadership

Planning, prioritization and iterative execution.

Cross-functional Teams

Engineering coordination and quality review.

Stakeholder Alignment

Clear communication across different priorities.

Long-term Thinking

Maintainability, adoption and continuous improvement.

LET'S START THE CONVERSATION

Let's find out how technology can help your business.

A practical conversation starts with a challenge.

Tell us what slows your business down, what you want to improve, or what you are ready to build next.
